**SOUTH WALES CAVING CLUB NEWSLETTER**

**INDEX TO NUMBERS 1-100**

**1946-1985**

**Compiled by**

***Anne Bell***

---

## **INTRODUCTION**

---

This Index includes all SWCC Newsletters up to Number 100 and the earlier series of Circulars published by the Club from 1946. There are two sequences: an author index and a subject index.

### **Scope of the Index**

The Index contains all articles published in the Newsletters and attributed to an author or authors: these appear in both sequences. In addition the subject index also includes selected items from short reports such as editorials, "Club News", "From the Logbook", etc where the information relates to a certain cave or topic of interest.

Obituaries and correspondence are included as are references to the Club rules and constitution.

Club officers' reports are listed in the subject index but their contents have not been individually indexed. Therefore anyone seeking exhaustive coverage of rescues and rescue practices should also look up all references listed under "Officers reports" to locate the cave rescue officers' annual reports. Remember also that the Secretary's reports may be a source of information on Club projects, digs and new discoveries. Photographs are indexed where they appear as publications in their own right rather than as illustrations to articles. Members' address lists are included. The following have not been indexed: items of Club news such as new members, marriages and changes of address; announcements of meetings, meets, forthcoming events and notices to members (eg about subscriptions).

### **Content of the Entries**

Each entry in the index shows the author(s) unless the item was unattributed, the title, which may be abbreviated for lack of space, a Newsletter number ranging from 0 to 100 inclusive, and the first page number of the item.

In the case of the Circulars, which have no sequential numbers and contain short reports rather than articles, the Newsletter number is always "0" and the date of the Circular appears where the article title would be. These entries appear only in the subject index. The "Our Caves" series is treated in the same way.

Page numbers have been inserted in the few instances where they were omitted from the Newsletters. The numbering scheme follows the same practice as other Newsletters in the sequence. Where additional pages have been produced with a Newsletter but not actually part of it, these pages have been assigned page number "0".

## **Author Index**

Multiple authors - Where there is more than one author the article appears in the Author Index under each person's name.

Form of entry - The form of the author's name has been strictly copied from the newsletter and not standardised in any way. Therefore persons may appear in the Index in a variety of ways - eg. "Little, WH" or "Little, Bill" exactly as it appeared in the article. Surnames have been altered where the spelling varied in order that all entries for a specific person will appear together.

Where the author of an article is not a person but is, for example, "Anon" or "Armchair cavers" this has been included in the Author Index. Articles that appeared without any statement of authorship have not been attributed to "Anon" and neither are they in the Author Index.

## **Subject Index**

As a rule articles will appear several times in the subject index. In every case an entry is made under the most specific subject heading describing the article eg. Moonmilk: Northern Lights, OFD. At the same time, however, a much more general heading will have been assigned to the same article. In this case the article also appears under Ogof Ffynnon Ddu: Northern Lights and Northern Lights, OFD. This enables the reader to find material on a very specific subject such as moonmilk and to find everything on a broader topic such as OFD. Items extracted from short reports such as "From the Logbook" and "Club News" are generally only indexed at the specific level.

Normally entries will not be found under phrases starting "cave" because this would cover most of the index. Therefore articles on "Cave Rescue" will be found under "Rescue" and "Cave diving" under "Diving". There are a few exceptions to this rule: "Cave life" and "Cave art" for example.

The subject headings are duplicated when an article has two authors.

---

## AUTHOR INDEX

---

- Aldridge JD**  
Thoughts on making an aquarobe, 55: 7
- Aldridge JD**  
Looking after the inner trog, 70: 17
- Alexander JM**  
Tunnel Cave, 13: 11
